

Baby Wipe Recipe

You will go through an awful lot of baby wipes before your baby grows up. These can be awfully expensive, but you don't need to shell out that much money. Here's an easy way to make them.

1 package of strong paper towels

4 ounces of baby oil

4 ounces of baby shampoo

2 cups of water

Mabel White

Cut the paper towels in half and remove the center. Put 1/2 of the paper towels in an old baby wipe container. Mix together the oil, shampoo and water and place. Pour 1/2 of the solution over the paper towels. This makes about 2 containers.
